PROFESSIONAL SUMMARY

Performance-driven Full Stack Developer with 6+ years of progressive software engineering experience. Technical expertise spans across the full software development lifecycle, from designing high-performance UI/UX components in React to implementing secure relational and non-relational databases (MongoDB, MySQL, PostgreSQL). Proven ability to transform complex technical requirements into scalable, secure full-stack applications while maintaining high code quality through unit testing and strict engineering standards.

TECHNICAL SKILLS

Front-End: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, Bootstrap, HTML5, CSS3
Back-End: Node.js, Express.js, Firebase, RESTful API, GraphQL, PHP
Database: MongoDB, MySQL, PostgreSQL
Unit Testing: Jest, React Testing Library
Tools: Git, GitHub, GitLab, Vite, Webpacks, JWT, OAuth, Jira(Project Management)
AI,Automation: Power Automation, Copilot, Azure OpenAI, PowerBI.
Others: C language, Java

PROFESSIONAL EXPERIENCE

DENSO TECHNO PHILIPPINES INC.

2019 – Present

Senior Design Engineer (2025 - Present)

- Lead project development lifecycles, ensuring alignment between design requirements and technical execution.
- Design and improve modern web applications using the React environment, focusing on high-performance UI/UX.
- Organize quality improvement initiatives by developing internal tools and applications.
- Mentor team members and conduct technical testing to maintain high engineering standards.

Software Engineer (2021 - 2025)

- Conducted web development and technical testing for core business applications.
- Optimized application performance and introduced feature enhancements to existing software suites.

Junior Software Engineer (2019 - 2021)

- Developed and implemented new application features based on technical specifications.
- Maintained code quality through standard testing and documentation.

PERSONAL PROJECTS & FREELANCE PROJECT

- SmartCart (E-Commerce): A serverless database using google sheets for real-time inventory management.
- Weather Update App: utilizing RESTful APIs for live, location-specific meteorological data updates.
- Time Management App: A productivity tool using React.js hooks and interval logic for real-time task tracking
- Full-Stack E-Commerce Platform: e-commerce featuring secure JWT authentication, protected routing, and a RESTful API integrated with a JSON-server backend.
- MERN CRUD Application: Application with Tailwind CSS and MongoDB, implementing full CRUD functionality.
- Budget Tracker: full-stack financial management platform, Built on the MERN architecture and modern redux toolkit 2 with Centralized, predictable state with async thunks.
- Shopify Demo Store: Developed a fully customized storefront implementing optimized product listings, tailored theme sections, and SEO best practices to maximize visibility.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology (2015-2019)

Pamantasan ng Lungsod ng Pasig

Certifications:

- JavaScript for Beginners: The Complete Course for Beginners
- JavaScript Coding Mastery2025
- CSS And Javascript Crash Course
- Build a ChatGPT-Like App with JavaScript, React&OpenAI
- CSS, JavaScript and Python CompleteCourse
- React, NodeJS, Express & MongoDB-The MERN Full-stack Guide
- ReactJS Masterclass
